Online Workshop on

Digital HR Transformation

24 September 2021, at 2pm to 5pm

Context

The HR revolution has already been ushered in and fabric of every company irrespective of the size has been continuously evolving to keep pace. Automation into standard business processes is not only convenience but also paves way to build an asset wagon that is ready to take on future markets and competition. The framework of the concept is to introduce digital technology such as HRIS, digital recruitment, team automated communication platforms, workforce engagement automation and people analytics tools at various levels as well as domains respectively.

Objectives

The objectives of this session would be threefold. Firstly, the inception of the concept of what and how related to HR digital transformation needs to be elaborated for a strong foundation. The second objective would related to learning about aligning the existing organizational practices to the digitally upgraded workspace in a seamless manner for amplified results. Last but not the least a number of used cases from the corporate realm would be studied to understand various facets related to the captioned topic.

Content

- The premise of HR digital transformation and understanding the stages of transformation.
- Various component and processes on a three dimensional matrix for successful transformation.
- Technological interfaces and tools introduction and demonstration.
- HR role as a centre pin in the business wide digital transformation and related strategies.
- Used cases from the industry to depict various stages, challenges and implementation strategies.
- Materials, interactive debates and discussions and intelligent fun
